

Austral FR Panel

Faces	A-C
Bond	C-Bond
BCA Fire Rating	Group 1,2
Emissions	E0 and E1 options available
Thicknesses	10, 13, 17 & 20mm
Dimensions	2400 x 1200mm

A Fire Retardant Panel by Austral Plywoods

Achieve a natural timber finish and meet BCA Fire Hazard regulations with Austral FR Panel. The Austral FR Panel is the perfect wall and ceiling panel that is:

- Group 1,2 compliant (BCA Specification C1.10a)
- Natural Hoop Pine veneer face
- Other specialty veneers available
- E0/E1 formaldehyde rating
- Chain of Custody certified (AS 4707:2006)

Important - Oil based stains are not recommended on plywood where the finished job will be subject to close scrutiny. Oil based stains tend to penetrate the face veneer of the plywood and strongly highlight the natural figure in the timber, darkening it considerably. In many applications this may not be desirable. Oil based stains also tend to swell the grain of the surface veneer, again potentially disfiguring the plywood.
